

## Delancey Street, Philadelphia, PA

### Project date:

Wednesday, February 11, 2015

A gorgeous center piece in a living room @ Delancey St just off of Rittenhouse Square in downtown Philadelphia. A seven foot by three foot 1/2" star phire glass wall with custom carved artwork pattern. Installed into u-channel top and bottom and sides, with LED lights, dimmable. All design, glass, sandblasting, carving and installation (including running the LED's in channel ready for hook-up) were done in house by Norman's Glass personnel. This is the type of attention to detail we can provide on your next custom glass artwork and walls. Contact us for a consultation.
